### PLATFORM FLAT TOP DESIGN

We have redesigned the platform by removing the ramp to maximise the working area.

### STEEL PLATFORM AVAILABLE

### FEATURES

- Platform has a flat surface design for maximised working area (no ramp).
- Increased cylinder diameter for longer lifetime.
- 2kw motor to lift extra weight (never stuck).
- Pendant hand control & battery isolator are standard on each unit.

### TESTING WEIGHT

- 25% > WLL as to Australian Standard.

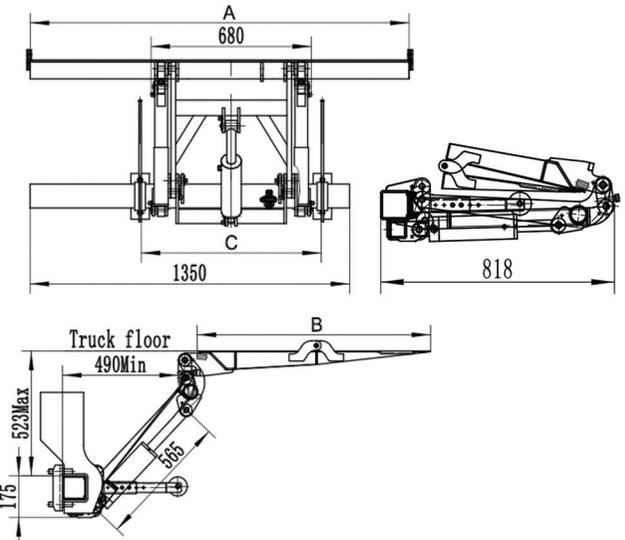

### FATIGUE TEST

- 11,000 cycle test, with standard load, equivalent to 10 years operation.

### AUSTLIFT DESIGN RULES

Australia is different, unlike Europe, which has cities and towns everywhere, it can be difficult to get local repair & service easily. For this reason we make special designs.

1. Built tough for long hauls on road.
2. No electronics board and simple mechanics for reduced breakdown and easy maintenance.
3. More robust hydraulic system to cope with unexpected lifting weight.

**AUSTLIFT TAIL LIFTS HAVE A CUSTOMISED DESIGN TO SUIT THE HARSH AUSTRALIAN CONDITIONS.**
