

Galvanised Drum Spill Bins

Drum Spill Bins Galvanised

Our range of SL Spill Bins provide complete protection against damaging and costly chemical spills and are available to cater for one (1), two (2) or four (4) drums.

Also available to suit the 1000 litre Intermediate Bulk Containers - refer SL-IBC.

Close spacing support bars allow for large or small drums up to 2000kg SWL. If required, timber pallets will fit within the raised skirt, or drums can be placed directly on the support bars.

All models have a spill capacity of at least 110% containment of the largest drum in accordance with Australian Standards, being classified as "portable" units.

SPECIFICATIONS:

- Safe Working Load: 2000kg
- Long Life Zinc Plated Finish (all models)

| Type | Number of Drums | Width (mm) | Depth (mm) | Height (mm) | Spill Capacity (litres) | Unit Weight (kg) |
|------|-----------------|------------|------------|-------------|-------------------------|------------------|
| SL 1 | 1 | 810 | 760 | 490 | 240 | 55 |
| SL 2 | 2 | 1210 | 610 | 440 | 250 | 60 |
| SL 4 | 4 | 1210 | 1210 | 265 | 245 | 70 |
