

Drum Storage System

SDBP - Bunded Drum Storage System

Suitable for Pallet Trucks

All liquids stored on site need to be safely banded, (as required by law) and in a unit which will contain at least the largest stored container should it spill. This is now a simple matter with SPILLDOKTOR poly drum bunds. Available in both 2 drum and 4 drum sizes, featuring removable grating and

provision for fork tynes, and made from heavy duty polyethylene for durability.

Model	Description	Capacity
SDBP2	Polyethylene 2 Drum Bund	240L
SDBP4L	Polyethylene 4 Drum Bund	230L
